Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it should be disclosed in one paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1 - 6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In particular, the fig. 1 (10,11), Page 11 of specification and claims recite that the output of a filter is differentiated with respect to the frequency, however, the output signal of a filter can be differentiated with respect to time, its derivative with respect to frequency is zero because it does not have frequency as a variable. Thus, applicant has not explained how to make and use the invention that relies on a result contrary to accepted differentiation rules. Applicant should clarify what is being differentiated with respect to frequency and what is the instantaneous frequency of the filter.

Art Unit: 2655

Claim Objections

Claims 1- 6 are objected to because of the following informalities: In claims 1 and 4, the claim language "...of each filter" should be changed to "... of the output of each filter...". because instantaneous frequency can only be defined for the filter input or filter output signals but not for the filter itself. Appropriate correction is required.

Allowable Subject Matter

1. No statement will be made regarding whether claims 1 & 4 would be allowable *speculation required in light of the* due to the rejection(s) under 35 U.S.C. 112, first paragraph, set forth in this Office [^] action.
